PFAS Settlement Money for Water Utilities Poised to Evaporate

Up to \$13.6 billion is available from settlements, but key actions to claim funds must be taken by January 1, June 30, and July 30 in 2026.

“Free money” is hard to come by these days. But potentially hundreds of water utilities across the country could be eligible to receive substantial funding to address toxic PFAS (“forever chemical”) contamination from a [settlement by 3M](#) and a separate settlement [by Dupont](#). In 2024, 3M agreed to pay up to \$12.5 billion to support PFAS remediation for public water utilities that detect the forever chemicals at any level. Under a [similar settlement](#), Dupont agreed to \$1.185 billion.
